

# Support Wedge Specifications

This foam-filled device is engineered to facilitate the safe transition of individuals to and from the ground, providing essential support during these movements. It serves as a stable platform for maintaining a semi-seated, monitored restraint on the ground, ensuring both physical security and procedural control.

## Support Wedge System

Expertly engineered, the Support Wedge allows for repositioning, enabling staff to adjust the individual's posture as required. This flexibility not only promotes greater comfort but also supports de-escalation strategies and enhances the effectiveness of monitoring throughout the process.

## Be creative with a range of colours

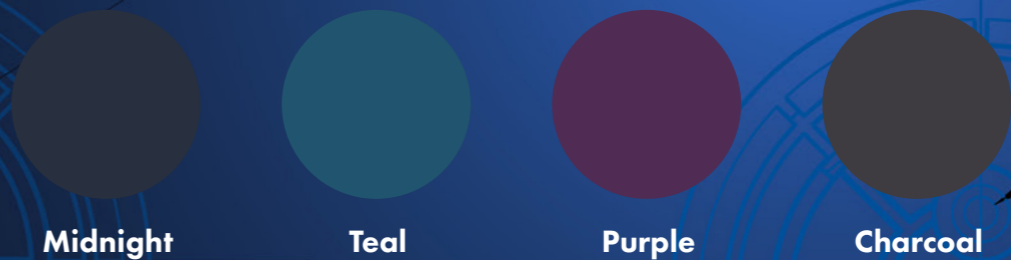

An eclectic collection of bold patterns and vibrant colours to inspire innovation and creativity. We also offer a bespoke design and embroidery service.

## Wedge Size

Size	Width	Depth	Length
Standard	24"	35"	35"
